Subject: Microsoft Settlement

The current Microsoft-proposed settlement is insufficient and unacceptable.

While I could write volumes about particular points, I won't waste my time. Microsoft cannot, yet again, be allowed to willfully break the laws of the US and go unpunished. Please "go back to the drawing board", or whatever court-equivalent process is required in order to recast the punishment for these crimes. I urge the courts to consider the entirety of the crime, and impose an equivalent and representative punishment.

Respectfully,

Steve Husty
